**Quantum Aviation Solutions Wins Contract for Baggage Tracking and Reconciliation at Indira Gandhi International Airport Terminal 3**

**Atlanta, Georgia, April 13, 2010** - Quantum Aviation Solutions was awarded a contract by New Delhi's Indira Gandhi International Airport (IGIA) to install BagScan, Baggage Tracking and Reconciliation System (BTRS), at the new Terminal 3 (T3). Quantum's BagScan will integrate with the airport's Baggage Handling System (BHS) to enable real-time tracking of baggage throughout IGIA. This provides visibility of all baggage from check-in or transfer baggage induction points, through to multi-level in-line screening check-points, outside/out-of-gauge, and baggage loading points.

Garry Earner, Vice President EMEA, Quantum Aviation Solutions stated, "This prestigious contract rubber stamps Quantum as a recognised and trusted solution provider in the BRS market. Whether hosting international airport and airline operations from Quantum's data centre, or deploying BagScan locally like IGIA, Customers benefit from a quality product and more importantly, service excellence."

Under the contract, Quantum's BagScan will help the airport stakeholders manage the reconciliation and tracking of domestic and international baggage. BagScan's scalable architecture means that it will be capable of providing reconciliation and baggage tracking for IGIA's projected 70 million passengers per annum operation.

In 2009, Quantum Aviation Solutions installed BagScan at Indira Gandhi International Airport domestic Terminal 1D. Quantum's BagScan delivers baggage reconciliation, management and tracking functionality to airlines at IGIA including IndiGo, Jet Airways, JetLite, Kingfisher Airlines and SpiceJet.
