Quantum Aviation Solutions Partners With DALGlobal Services to Offer Special Needs Passenger Tracking

Atlanta, Georgia, September 17, 2008 - Quantum Aviation Solutions, Inc. announced it will partner with DALGlobal Services to offer PAXTrack®, real-time passenger tracking for special needs passengers. This technology will allow Quantum to help its airport and airline customers meet recent initiatives that require better service for special needs passengers including the disabled and unaccompanied minors.

"We are excited to offer PAXTrack as part of the Quantum product suite," said David Kennedy, President and CEO, Quantum Aviation Solutions. "Quantum is focused on providing its customers with cost effective technology to assist below-the-wing operations. The addition of PAXTrack allows Quantum to expand its products, and provides a solution to help airlines and airports comply with increasing regulations for special needs passengers."

"We have been aware of Quantum's success with baggage tracking and felt the partnership would increase the reach of PAXTrack to European and Eastern markets as well as provide continued growth in our core market, the United States," said Pete Weiland, Vice President of Operations, DALGlobal Services. "PAXTrack's patent pending technology is the ideal solution for aviation companies that emphasize passenger service and will help these organizations accommodate an overlooked segment of travelers."

PAXTrack combines Geographic Information Systems, wireless personal computers, and digital mapping in a dispatch system, to create an operating framework that serves special needs customers more effectively.

About DALGlobal Services

DALGlobal Services is an aviation services company providing ramp and passenger handling services for domestic and international carriers in the U.S. DALGlobal Services delivers consistently superior services that give customers the operational edge they need for success in today's competitive air travel industry. Applying its proprietary service formula gP³, DALGlobal Services currently handles more than 590,000 flights each year, representing every major U.S. carrier, through an expansive network of more than 50 airports.

About Quantum Aviation Solutions

Quantum Aviation Solutions was established in 2005 by a team of airline industry experts with deep and lengthy experience in the areas of baggage handling and management. The firm's initial offering, BagSuite, a baggage information monitoring solution, is the next generation of a system originally developed and marketed by Lufthansa Systems Group. BagSuite includes BagScan, a baggage reconciliation system (BRS) and BagTrail, a baggage management system (BMS). Quantum acquired BagSuite as the first member of a family of airline and airport solutions and services. Quantum is headquartered in Atlanta, Georgia with offices in London and New York. BagSuite is currently used by over 50 airlines and airports worldwide. For more information, please visit www.quantum.aero.
